

Impact Your Future

International Graduate Programme (f/m)

For our new

Engineering Centre of Excellence in Bratislava, Slovakia,

We are seeking talented graduates. [This is your opportunity to become a valued participant in our International Graduate Programme.](#)

Invensys is a global automation, controls and process solutions group. Our products, services, expertise and ongoing support enable intelligent systems to monitor and control processes in many different environments. With nearly 30,000 employees worldwide, we help companies perform better.

Your mission:

Be part of our two-year graduate programme which includes two months of intensive training at one of our Invensys EMEA (Europe Middle East and Africa) locations, followed by practical "on the job" training in the office or at a customer site. You will have the opportunity to experience engineering, proposals, sales, services in order to best choose your career path.

Our commitment:

Everyone has a passion. At Invensys Process Systems, we want to help you to tap into your passion to accelerate your career development. Working at Invensys, you will experience the cultural differences, challenges and advantages associated with international business. Invensys provides a competitive salary package and regular performance based salary reviews.

Requirements and education:

- Graduation in Engineering or Information Technology background
- Energized by new technologies
- Fluency in English (oral and written)
- Team skills, excellent communication skills, open to worldwide travel

If you are interested in becoming one of our future technical experts or business leaders, send your resume with a cover letter to the address below or contact us by email indicating your earliest starting date and salary expectations.
